

ELIMINOSTAT

Air Electrodes ELIMINOSTAT BUAS Bar electrode for small spaces

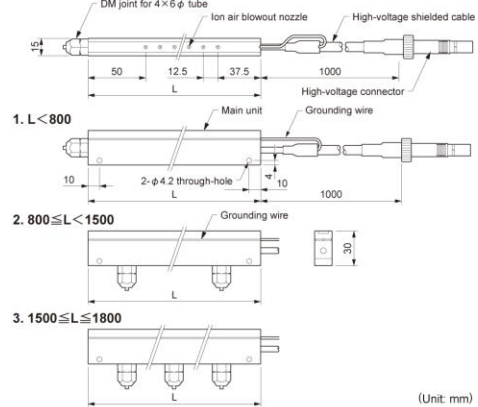

(Standard cable length : 1m)

The compact shape enables this model to be installed practically anywhere. It has also been designed for low air consumption.

The position of the air joint is different depending on length.

Dimensional Diagrams

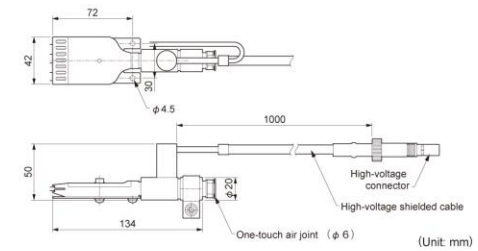

Air Electrodes ELIMINOSTAT FAPS-GP Electrode with flat nozzle

(Standard cable length : 1m)

The flat nozzle uses a laminar airflow for powerful dust elimination results.

Dimensional Diagrams

Air Electrodes ELIMINOSTAT AP-5 Electrode with pointed nozzle

(Standard cable length : 1m or 2m)

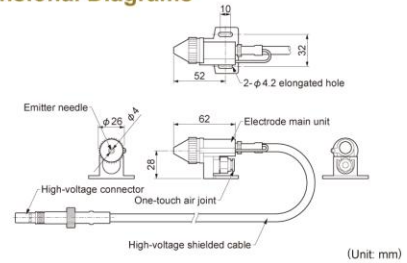

The pointed nozzle makes this electrode ideal for use with small objects.

With Nozzle Cap A

With Nozzle Cap B

Dimensional Diagrams

Air Electrodes ELIMINOSTAT AG-5 Ion air gun

(Standard cable length : 2.5m or 5m)

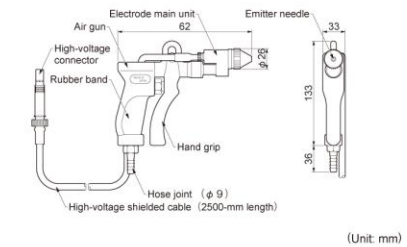

The safety design eliminates contact with the emitter needle for even safer operation.

With Nozzle Cap A

With Nozzle Cap B

Dimensional Diagrams

Air Electrodes ELIMINOSTAT ALS Bar electrode for long-length applications

(Standard cable length : 1m)

The ALS electrode is the optimum model for long-length applications.
